STAR AL MADINA
PEST CONTROL CLEANING SERVICES

It's all start with you

Your Health . Our Pest Control

eliminating pest control effectively

OUR SERVICES

We, as a professional pest control service provider in Dubai, guarantee competitive rates and 100% customer satisfaction.

General Pest Control

Elimination of Cockroaches, Mosquitoes, Flies, Lizards, etc. through the application of non-toxic chemicals with formulations specifically suited for the Dairy and Food Industries, as well as the prompt removal and disposal of pests that have been eliminated in accordance with government of UAE and WHO standards.

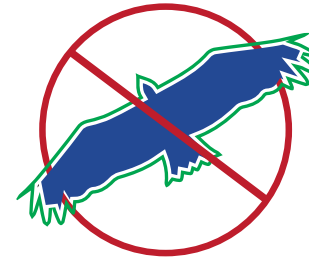

Termite Pest Control

Termites or white ants have become another biggest pest problem. Any structure made of wood or cellulose is the major target of termites. They attack and damage these structures as soon as they infest the structure. We present the best inspection and design right prevention strategies to termite control Dubai.

Sanitization / Disinfection

Sanitation is the process of cleaning and removing food and dirt from surfaces. This helps to reduce the number of harmful bacteria that can cause illness while disinfection is used to control foodborne illness by killing pathogens that may be present on foods or in the processing environment.

Birds Control

We look to get rid of the birds without causing serious harms to the birds as we understand they are also an important part of huge ecosystem. Our services are highly economical compared with the thousands of dollars spent on cleaning bird debris and droppings on the building.

Water Tank Cleaning

Dirt, debris and other contaminants can build up in water tanks over time, affecting the quality of your water. Water tank is the perfect breeding ground for bacteria, and it's not unusual to find Legionella and other water-borne diseases lurking within them. That's why Dubai Municipality recommends water tank cleaning every six months.

Speaslist Cleaning Services
